Hometown:

Needham, MA

What animal do you feel you
most closely resemble?

A golden retriever. I'm mainly calm, quiet, and laid-back, but around my friends and people who share my interests I get wildly enthusiastic. Plus I'm 100% okay acting totally silly (occasionally at unexpected times!).

If you could create your own
animal hybrid, what would it be ?

Probably an eagle and a horse (don't ask me to name it; no mashup of those words works!!). Because I desperately wanted flying horses to exist when I was little-- and maybe still do, shh ;) And an eagle seems an appropriately majestic creature to merge with another beautiful animal. But where to fit in those talons...?
