S-L Program Assistant

**College:**

College of Social Sciences  
and Humanities

**Major(s):**

Human Service

**Minor(s)**

International Affairs

**Hometown:**

Loudonville, OH

What animal do you relate to most and why?

I relate to sloths in so many ways. I can sleep almost anywhere, anytime. I once slept for 18 hours straight. Also, they are very solitary creatures, spending most of their time alone. I would consider myself an introvert at heart.

P.S. Sloths are not comfortable being around humans so don't ever support an organization that allows you to hold a sloth.

What animal do you feel you most closely resemble?

I would love to live in the foothills of a mountain by a stream. I love forests and being surrounded by nature. I hope to someday be able to grow most of my own food and fall asleep to the sound of water.
