Many Paths to PRIVACY
Exploring Privacy Across Fields

THURSDAY, APRIL 5, 2018

4:00–7:00 pm
Northeastern University
School of Law
250 Dockser Hall
65 Forsyth Street, Boston

Privacy has become a key concept in the digital age. Industry, government and members of the general public all have unprecedented access to data and people in ways that were unimaginable even just 50 years ago. Many different perspectives are needed to answer the important questions that remain about what privacy is, its role in the modern world and how it should be fostered. This conference will bring together expert voices from engineering, political science, law, computer science, network science, anthropology and philosophy to examine the modern notion of privacy in our lives and the many different roles people can play to shape it.

SPEAKERS INCLUDE:

KHIARA BRIDGES
Professor of Law and Professor of Anthropology, Boston University

DAVID CHOFFNES
Assistant Professor, College of Computer and Information Science, and Member, Cybersecurity and Privacy Institute, Northeastern University

CANDICE DELMAS
